Update! ITS1827 Traffic Signal Configuration forms.

ITS Now are delighted to announce, that we are undertaking an update on the ITS1827 Traffic Signal Configuration forms.

These forms are used by the majority of designers to specify the required functionality for traffic signal controllers. We are also very pleased that our friends at **Aecom** have volunteered to assist with this process, so we wish to take the opportunity to thank Mark Stapley, National Traffic Control Engineering Lead (UK&I) for their involvement.

For reference, the current version of the forms, ITS1827, version D, is freely available to download from the **ITS Now** website at <https://www.itsnow.org> in the publications section.

Please get in contact with Alistair if you have any thoughts about changes you would like on these forms, we'll collate these and implement the suggestions where these are feasible.

Ends>>

Notes to Editors

ITS Now - Intelligent Transport Systems, explained.

Bio

Alistair Gollop is the Founder of **ITS Now** which exists to promote best practice and professional development within the Intelligent Transport Systems (ITS) sector. **ITS Now** originates resources ranging from videos, reference books and guidance documents through to informative references and educational content.

Alistair is a recognised Intelligent Transport Systems industry figure with over 30 years in-depth experience, resulting in an extensive specialist knowledge of traffic systems. He is a freelance consultant at **The Alistair Gollop ITS & Traffic Signal Consultancy** (www.AlistairGollop.com) carrying out a wide range of Intelligent Transport Systems and Traffic Signal related consultancy services. A former Technical Principal at Mott MacDonald, he has particular experience in preliminary equipment assessments, due diligence reports, field trials and integration into traffic systems and has a detailed knowledge of specialist technologies and equipment, standards and statutory requirements, along with ancillary issues, such as passive safety and the implications these pose on the design and management of traffic system installations. As well as the UK, Alistair has worked in diverse locations across Europe, South America, Africa, the Middle East, Asia and Australasia. He is the author of the well-respected "Traffic Signals" and "Traffic Control" books, along with numerous articles for publications. In addition to presenting at conferences, he is a regular panellist and facilitator at events. As the Chair of the Professional Development Portfolio, he sits on the executive board of The Institute of Highway Engineers.
